about breast  
cancer screening

# All women are at risk for breast cancer<sup>1</sup>

The American Cancer Society recommends **women aged 45 and older** should have regular mammograms.<sup>2</sup>

- They also recommend women aged 40 to 44 should have an option to start annual mammograms. Women with a higher risk of breast cancer may need to begin screenings earlier. Recommendations from other health organizations vary.
- Talk with your doctor about what is right for you.

In about 85% of breast cancer cases, there is **no family history of the disease.**<sup>3</sup>

*My friend found out she had advanced breast cancer. She passed away 6 months later.*

*I get a mammogram to catch it early.*

## Getting a mammogram may save your life<sup>4</sup>

According to the American Cancer Society, regular screening is the most reliable way to **catch breast cancer early.**<sup>2</sup>

- **99%** of women who get **diagnosed** with localized breast cancer at an early stage (when cancer is only in the breast) are **alive 5 years after** their diagnosis<sup>5</sup>

*My friend had no lumps.  
My neighbor had no symptoms.  
Both had breast cancer.  
I get a mammogram  
for some peace of mind.*
