All women are at risk for breast cancer¹

The American Cancer Society recommends **women aged 45 and older** should have regular mammograms.²

- They also recommend women aged 40 to 44 should have an option to start annual mammograms. Women with a higher risk of breast cancer may need to begin screenings earlier. Recommendations from other health organizations vary.
- Talk with your doctor about what is right for you.

In about 85% of breast cancer cases, there is no **family history of the disease.**³

There are many reasons to get a mammogram

3 kids, 2 grandkids.

I get a mammogram for my family.

What's
your
reason
for a **mammogram**

A stylized pink silhouette of a woman's head and shoulders, facing left, which forms the shape of a question mark.

Take care of yourself and your family.

Start a new tradition for your daughter, granddaughters, and nieces by getting a regular mammogram.

Getting a mammogram may save your life⁴

According to the American Cancer Society, regular screening is the most reliable way to **catch breast cancer early.**²

*I take care of myself
so I can enjoy life fully.*

*I get a
mammogram
for my future.*

- **99%** of women who get **diagnosed** with localized breast cancer at an early stage (when cancer is only in the breast) are alive **5 years after** their diagnosis.⁵
